

What role will the ICC play?

India Climate Collaborative

- Support & leverage Indian philanthropy
 - Deepen philanthropic engagement on climate issues through knowledge and capacity building
 - Use philanthropies' collective expertise, funding, and networks to define an Indian climate agenda
- Connect & deepen India's climate ecosystem
 - Cultivate a network of partnerships across diverse Indian and global climate actors
 - Enhance the capacity of India's climate actors through funding, training, and information sharing
- Set the stage for Indian leadership
 - Shape the national discourse on climate change
 - Take Indian perspectives to the global stage
 - Define sector-wide priorities, and drive intelligent investments into strategic areas
 - Build a deep sense of awareness across society

ICC's Theory of Change

Vision

To tackle climate change in India by protecting vulnerable communities, capitalizing on emerging opportunities, and establishing India as a leader in the global movement.

Mission

The ICC will be a catalytic platform that helps philanthropy build a broader movement around climate and development in India, and globally.

Programs & Outputs

Goals

	Reduce the transaction costs of engaging on climate change	Increase the urgency of engaging on climate change	Provide a unique platform for Indian leadership	Build capacity to act on climate change
PARTNERSHIPS AND NETWORKS	Networked ecosystem of climate actors Greater collective investments + partnerships	Peer influence via trust-based member relationships Informed narrative to boost action among members	Voice for all Indian philanthropies	Improved decision-making among members
KNOWLEDGE CREATION	Reduced duplication of knowledge investments Shared MEL agenda and metrics	Defined priorities to build evidence for action Foundational research for the ecosystem	Scalable Indian successes amplified	Digestible guidance for climate-lens design and implementation
LEADERSHIP & AWARENESS	Partnerships and common framework for awareness-building	Improved awareness and concern across society	Engaged, diverse voices in debates Leaders creating enabling policies to meet INDCs/SDGs	
TECHNICAL ASSISTANCE & EXPERTISE	Seamless linkages between philanthropies and service providers	Capacity built to address expertise gaps that hold philanthropies back		

PARTNERSHIPS AND NETWORKS

KNOWLEDGE CREATION

LEADERSHIP & AWARENESS

TECHNICAL ASSISTANCE & EXPERTISE

- ACTIVITIES**
- Convene frank and open dialogues to build trust among members
 - Host member-chaired thematic sub-groups to promote co-learning and investing
 - Identify synergies between members with shared interests
 - Publicly pitch shared agenda and amplify members' work and thought leadership

- Conduct/commission foundational research to address knowledge gaps in India
- Create digestible guides and compendia to support philanthropic excellence
- Develop shared, India-specific climate metrics
- Gather member insights to craft a shared evaluation agenda for India

- Organize public informational debates and awareness campaigns to inspire action and advocacy
- Rally journalists via trainings to promote digestible climate content in mainstream media
- Encourage member partnerships and co-investments in advocacy
- Support members to advocate collectively for systemic change

- Aggregate information and contacts on service providers and experts in India
- Provide ad hoc match-making to meet member expertise needs
- Synthesize and highlight priority expertise gaps, and suggest solutions to address them
- Organize trainings for members on key technical expertise areas

- MEMBER ROLES**
- Pool learnings and resources
 - Lead events and share experiences
 - Share knowledge, priorities, and data regularly

- Collectively identify knowledge gaps and set research agenda
- Share existing knowledge products with other members

- Disseminate and create content and thought leadership on climate issues
- Actively participate in, and lead awareness and advocacy campaigns

- Share service provider networks
- Share understanding of gaps in the supporting climate ecosystem
- Build capacity through trainings, and invest to build expertise in the service provider ecosystem

Peer network portal that connects members to each other and the broader ecosystem

Updates containing climate news, analysis of relevant themes, and member updates

Thematic sub-groups to identify areas for innovation and investment, and mobilize cross-sectoral resources

Climate guidebook that highlights gaps, opportunities, and programmatic strategies for climate-adjacent sectors in India

India-specific Drawdown that showcases relevant solutions, pathways, evidence of success, and partners that can support implementation

Annual State of Climate Change in India that provides landscape analysis for India, and updated climate data and resources

Public informational debates that boost climate visibility, improve the quality of public discourse, and provide a call-to-action for society

Policy and advocacy support for members to advocate for shared priorities, and to develop outcome-driven and audience-targeted messaging

Leadership on the global stage at key forums to showcase Indian perspectives and approaches

Matchmaking support to identify member needs and broker connections with Tpartners

Trainings on technical areas with step-by-step guidance, co-creation of new approaches, and member share-outs
